In Fall 2005 Innoviant completed our transition to a new platform which provides improved claims processing flexibility and performance. As a result of this upgrade, standard quarterly reports are being generated from a new application.

We are currently generating reports for fourth-quarter 2005 and are working through a quality assurance process to review data integrity and aesthetics. This process is getting our full attention, but is running longer than anticipated. We will deliver all reports as soon as we can.

When you receive the reports, you will notice several differences in appearance and report content. We intend to deliver more meaningful and complete data in the new, more robust report format. Highlights include:

- Side by side comparisons of each quarter of data in tabular form
- Average wholesale price (AWP) discount report in place of the age and gender report

“  
We intend to deliver more meaningful and complete data with the new, more robust report format.  
”

- Brand and generic utilization summary
- Executive summary in bar graph form highlighting key data indicators

If you have any questions about the reports when you receive and review them, please contact your Innoviant account manager at 866-800-4321.
